

QUALITY POLICY

Tekyol Plus, as a company operating in the construction contracting sector both domestically and internationally, is focused on providing its customers with professional services of the highest standards. In this process, Tekyol aims for continuous improvement by implementing long-term quality, occupational health and safety, environmental protection, as well as process and cost control.

To achieve its objectives, Tekyol Plus implements an effective quality management system that complies with the ISO 9000:2015 standards.

In order to realize the goals set forth in this policy, the senior management of Tekyol Plus commits to:

Utilize a consistent, regular, and effective management system for occupational safety, employee health, environmental protection, and quality assurance.

Foster a culture of quality, environmental awareness, and occupational safety among all employees.

Establish a culture of quality sensitivity and responsibility within the company through training for suppliers, workers, and subcontractors.

Regularly monitor performance at all levels of the company, generate improvement plans, and report any situations that do not align with company objectives.

Investigate the root causes of any conditions where adequate performance is not achieved, in order to prevent the recurrence of issues.

Collaborate with suppliers who share the high targets of Tekyol Plus regarding occupational safety, quality, environmental, and process management.

Comply with the requirements of legal regulations and applicable conditions.

Tekyol Plus Construction Industry Inc.
